

Personal Tracking Page for Students

Instructions for Teachers:

Below is a worksheet designed for students, which will help them stay organized throughout the entire process of the Jigsaw lesson.

The worksheet will help students recognize their role and keep track of the required information throughout the entire continuous process. You can print the page for each student to complete as they participate.

During the activity, students will move between groups and will write down the important points that will help them complete the activities. This tool can also be used for teacher evaluation.

Personal Tracking Page

During this lesson, you will start in a home group and then move to the expert group before returning back to your original home group again.

In order to organize the different sections for yourself, write down the main things you have learned from each group.
