Game Created By

This Game was developed by Masuah, with support from United and Misrad Hatefutzot. The Kahoot you have here was made with Kahoot Pro+ and you will find some special features that are less well known in general but help make the game more robust. Some questions are typical asking respondents to select the correct answer. In some instances, the player is asked to identify what is inaccurate or to put answers in the right order. On certain occasions the participants must write the answers or choose them through photos. There are times when the correct answer is a number that participants must choose from a numerical scale. In the questions in which you will find videos, the leader must direct participants to start answering only after completing viewing the entire clip.

It should be emphasized with participants that it is essential to take the time to comprehend the questions and not merely rush through for the sake of answering. After each question or at the end of the game (once the game is over, it is possible to show all the correct answers and what percentage of the participants answered them), it is highly advisable to take the time to delve into each of the questions so that in addition to the excitement of the competition, the content exposed through the game is fully comprehended.
