

Think-Pair-Share

Student worksheet

Instructions for Teachers:

Below is a worksheet for students to fill out throughout the different sections of the learning method. At the top of the page, students can fill in the question or problem that the lesson is centered around.

During each section, students will track the learning process-either individually or with a partner. Students will then share with the rest of the class.

This worksheet can also be used as an evaluation tool for teachers. It is beneficial to share with students in advance that their work will be collected.

Think-Pair-Share 1/2

Student Name: _____

On the page below, you can follow along with the learning process.
Ready to begin? :)

The first section:

write the topic/question that we are dealing with:

Think

Now, the next section:

Use this space to take notes and come up with your own answer and thoughts to the question or topic discussed in class

Think-Pair-Share 2/2

Pair

Use this space to take notes on your partner's ideas and answers, even if they are similar or different from your own.

Share

Use this space to come together and create an answer that reflects the ideas of both you and your partner.

*Please note: It is important to write your thoughts down clearly and in an organized manner, since you will be presenting your ideas with the class:
